

## Summary

I am a research scientist at Google DeepMind, where I study long-context sequence modeling (e.g. LLMs) and strategic and interactive machine learning. I am currently particularly interested in resource-efficient approaches to long-context models. I am also very interested in questions at the intersection of multi-agent learning, strategic learning in games, incentives for data collection and collaborative machine learning, and algorithmic game theory.

## Education

### Columbia University

2017 — 2022

- Ph.D. in Computer Science
- Advisors: Professor Daniel Hsu, Professor Alex Andoni
- Thesis: *Resource-Efficient Methods in Machine Learning*

### Princeton University

2012 — 2017

- A.B. Mathematics (cum laude), M.S.E. Computer Science
- Advisors: Professor Sanjeev Arora, Professor Ken Norman
- Master's Thesis: *Temporally Dependent Mappings between fMRI Responses and Natural Language Descriptions of Natural Stimuli*

## Industry Research

### Research Scientist, Google DeepMind

2023 — now

- Research scientist working on long-context sequence modeling, resource-efficient and principled LLMs, and questions at the intersection of multi-agent learning and interactive, strategic learning in games.

### Research Scientist, Google Brain

2022 — 2023

- Core contributor on Google's Bard project for both modeling and evaluation.
- Core contributor on the Long Context workstream for Google's PaLM 2 model.

### Student Researcher, Google Brain

2021 — 2022

- Part-time employment as a student researcher.

### Research Intern, Google Brain

2021

- Research internship on training deep neural networks with resource constraints.
